

Reports Tuned to Your Unique Business Intelligence Requirements

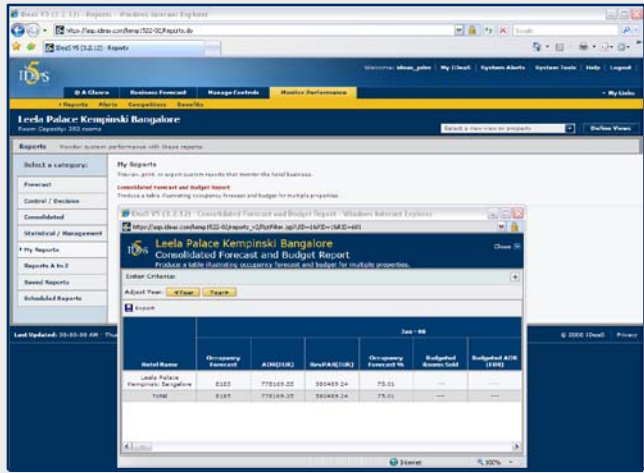

IDEaS V5i products offer a host of reports designed to highlight business trends and to keep users in touch with the ever changing landscape of today's business environment. While users rely on these reports that are targeted for the key areas of Forecast, Decision and Management; IDEaS recognizes that there is further demand for additional reports to help you better manage your business. To answer this need, IDEaS has created a Custom Reports service designed to provide client-driven and highly specialized reports directly through IDEaS V5i products' interface.

My Reports

Hoteliers work in a constantly changing environment and are often looking for ways to manage the multitude of data elements within their reach. While the IDEaS V5i products contain a rich supply of reports, there is a need to provide an additional level; reports that are unique to your specific business or simply a report that is proprietary. These kinds of reports are now just a click away.

Custom Reports are accessed from a category within IDEaS V5i products called "My Reports". Your reports are always at your fingertips, just like the other reports currently available in the system. Permissions for viewing these reports may be set so that only certain users can view or access the report. Custom Reports may be exported in a variety of ways, including PDF, Excel and XML.

Now you can get the reports you need to manage your business. Let IDEaS work with you to provide the unique business intelligence you need to better manage and monitor your business.

Preview, print, or export custom reports that monitor your business.

Key Benefits

- Custom Reports provides an almost limitless number of options for reporting to satisfy your business intelligence needs.
- Custom Reports are accessed within the IDeaS V5i products through “My Reports”. There is no need to use other programs; reports are always one click away.
- Reports may be generated one-time only, monthly, weekly, and even daily to meet business needs.
- Access to these reports is controlled via Roles and Permissions.
- Create reports for single properties only, or consolidated reports to enable comparison between multiple properties.
- Spend time on your business, not on reporting – IDeaS development means error-free delivery of the information you need.

How it Works

Custom Reports starts with you. What business intelligence do you desire? Once you have an identified need just contact your IDeaS Client Relationship Manager. We will work with you to design the report you need. IDeaS will develop, test, and then deliver reports through IDeaS V5i products’ interface where they can be easily accessed.

Custom Reports delivers the business intelligence you need when you need it.
