

Multi-Property View

Access all Properties Remotely, Instantly, From Anywhere in the World, Anytime

Whether you manage a multi-national chain with global group business or two bustling properties, with IDEaS V5i Centralized Control module you now have the opportunity to optimize demand and increase revenue by accessing all your properties remotely, instantly, from anywhere in the world, anytime.

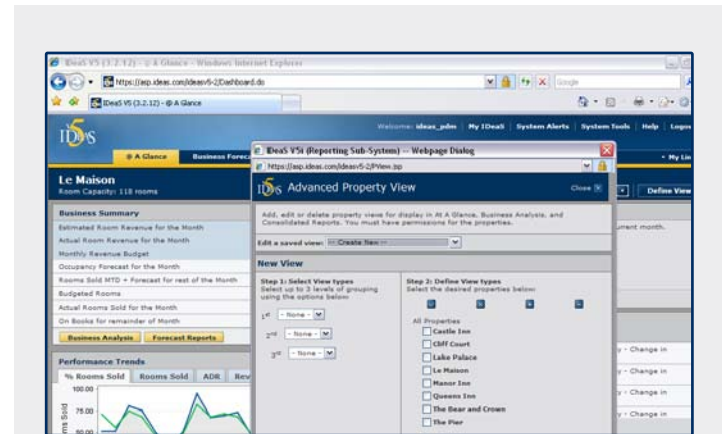

Key Benefits:

- Access all properties remotely, 24/7, regardless of time zones and geographical locations
- Maximize revenue across a cluster of properties to optimize demand and increase revenue and profitability
- A variety of reporting options provide a clear view of data across multiple properties

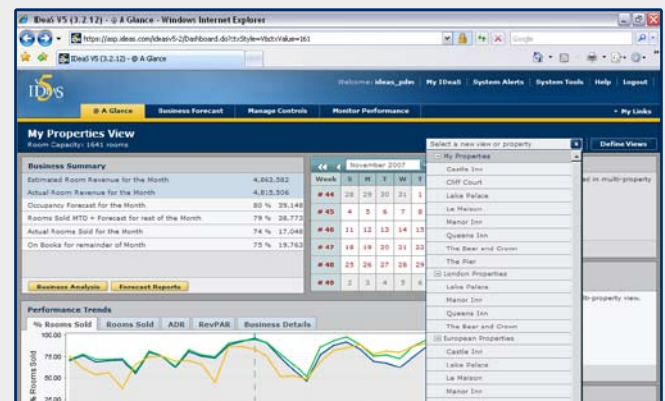

How it Works

IDEaS V5i Centralized Control module allows you to perform business analysis, review real-time hotel data and manage by exception, across multiple properties.

Layering daily decisions against the real-world issues of staff realignment, turnover, or operating costs becomes difficult to address with a multiple property estate. With IDEaS V5i Centralized Control module you can now execute hands-on centralized revenue management strategies in a timely manner, allowing you to maintain productivity when resources are low or not available.

A simple screen allows unlimited user defined multi-property views.

Easily change your view from a single property to a consolidated view.

Consolidated Reporting

IDeaS V5i Consolidated Reporting is available to support the revenue management culture and systems already in place at your hotel. The Occupancy and Alert Highlighter reports allow you to filter data based on your parameters; highlight those properties that need extra attention and act upon them in a timely manner.

Cluster Yielding

A requirement for hoteliers who have the ability to yield across properties, IDeaS V5i Cluster Yielding* gives hoteliers the opportunity to maximize revenue across a cluster of properties. Hotels are easily grouped according to the business needs of the operation with user-defined flexibility. Recommendations can be easily implemented by a central reservation office. Any combination of hotel properties can be included to optimize demand and increase revenue and profitability. (* Available for IDeaS V5i)

No matter how large and diverse your estate, no matter where your hotels are located, IDeaS Centralized Control Module is designed to put you in command of your data.
